Introduction An instrumentation system obtains data about a physical system either for the purpose of collecting information about that physical system or for the feedback control of the physical system Any instrumentation system must include an input transducer sensor
Fundamentals of Instrumentation and Control
INSTRUMENTATION AND CONTROL TUTORIAL 2 – SENSORS AND PRIMARY TRANSDUCERS This tutorial provides an overview of instrument sensors used in process and automatic control It is useful to anyone studying measurement systems and instrumentation but it is provided mainly in support of the EC module D227 – Control System Engineering This tutorial is mainly descriptive Control is a broad concept
